

## Free Online Stock Image Sources

As business owners, active on social media with a professional online presence, we are constantly in search of quality images that can be used, without breaking the budget ... or copyright and usage conditions.

The team at Easy As Marketing have scoured the internet for some of the best sources for FREE images that can be USED FOR COMMERCIAL PURPOSES (aka to support your business writing) read through the terms and conditions of these sites and believe that the images that are on these sites can be used for your commercial purposes in social content or blog articles etc. Generally they cannot be sold "as-is", so you can't do up a file of images and sell them, and in many cases cannot be printed onto merchandise which is then sold.

We highly recommend that you double check the individual site terms and conditions to ensure they are suited to your specific needs.

Different sites have different types of images, so some will be more suited to your industry also.

Explore to see which are most suited to you. Please note that there may also be restrictions on usage if depicting smoking/drinking or illegal activity.
